#### 4.3 Technically not supported

#### 4.3.1 Technically not supported in SwyxWare 12.00

Feature	Summary
SwyxPhone L4xx	Regarding these devices there is the change that the old SwyxPhones L4xx are no longer supported.  The reason for this is that we have switched to OpenSSL 1.1.1. and unfortunately, these devices cannot adapt to it. <a href="https://db.swyx.net/ssdb/preview_kb.asp?id=kb4881&amp;lan-guage=de&amp;print=1">https://db.swyx.net/ssdb/preview_kb.asp?id=kb4881&amp;lan-guage=de&amp;print=1</a> Important:  These devices must be removed from the network, otherwise errors will be written to the tracing files.

### 5 Important Information

#### 5.1 Hardware Requirements

If you want to use the new SwyxControlCenter (MS IIS is the prerequisite for this) and Yealink devices, we recommend using at least 4GB RAM.

#### Knowledge Base article:

https://www.swyx.com/products/support/knowledge-base/article-details/swyxknowledge/kb2155.html

#### 5.2 Supported databases for CDR database

From this release onwards, for saving the Call Detail Records (CDR), only the following data-bases are supported:

- Microsoft SQL Server
- MySQL (ODBC)
- PostgreSQL (ODBC)

#### 5.3 Use of Jabra devices with Swyxlt!

If you want to use devices of Jabra together with SwyxIt!, please mind the following hints:

- After an update of SwyxIt! a restart of Jabra direct is required to ensure proper operation
- Accepting a secondary incoming call using Jabra device buttons may terminate an existing primary call
- Toggling between two concurrent calls or putting an existing call on hold using Jabra device buttons may not be possible
- The ringing behaviour of Jabra devices is not only determined by settings in SwyxIt! but is also impacted by settings in Jabra Direct

#### 5.4 Use of Sennheiser devices with Swyxlt!

When using Sennheiser headsets with Swyxlt!, the software "Sennheiser HeadSetup™ Pro" should not run at the same time with Jabra Direct.

#### 5.5 Use of new Swyxlt! skins

- When using one of the Visual-Contact-enabled new Swyxlt! skins for UHD screen
  resolution on a UHD display, then the screen scaling in the Windows settings should
  be set to 200% to achieve an optimal display of the Visual Contacts part inside the
  Swyxlt! window. As an alternative, the user can adjust the size of the Visual Contacts
  area of the Swyxlt! window by pressing the Ctrl-key and scrolling up or down.
- When using multiple monitors with different screen resolutions (e.g. one UHD monitor and one HD monitor), to achieve an optimal display of a Swyxlt! skin with a UHD screen resolution, the UHD monitor should be configured as the main monitor in the Windows settings. As an alternative the user may chose a Swyxlt! skin with a resolution lower than UHD.

#### 5.6 Swyxlt! With Outlook

• In the context of removing an issue with security warnings that appear when Outlook is used together with Swyxlt! (Swyx bug 185649) a new Windows Registry Key has been introduced that rules if the previous Outlook warning appears. In the registry key path "Computer\HKEY\_CURRENT\_USER\Software\[XXX]\OutlookAddIn\SecurityManager\" (with [XXX] being Swyx or T-Com), the registry value is named "DisableOutlookSecurityWarnings", the type is a DWORD and the values are: '0' to have the security warnings enabled (default behaviour); '1' to have them disabled. Even if the Registry Key was set to '1', the warning messages still appear, though, when creating, editing or deleting an Outlook contact. If the new Registry Key was not already created by Swyxlt!, the user can do so at the aforementioned path with the specified type and desired value.

### 6 Installation Requirements

#### 6.1 Microsoft .NET Framework

For the installation of (or an update to) SwyxWare 11.38 or SwyxIt! 11.38 (or higher) the installation of .NET 4.7.2 or newer is required.

#### Details:

https://support.microsoft.com/en-us/help/4054566/microsoft-net-framework-4-7-2-for-windows-8-1-windows-rt-8-1-and-windo

# 6.2 Operating System Windows 7, 8.1 and Server 2012 R2, Server 2016 or Server 2019

The SwyxWare 11.20 and newer needs new C Runtime and C++ Redist packages. Those are already available in Windows 10 and Server 2016 and 2019.

If Windows 7, 8.1 or Server 2012 R2 are used, please install the last updates for these operating systems. The new C Runtime and C++ Redist packages will be installed with these updates.

#### 6.3 **Server**

- a.) Windows OS requirement: please ensure that ongoing or due Windows updates are completed before starting to install or update SwyxWare components.
- b.) After the installation of the server components, the Config Wizard starts and must run to the end. Do not terminate the Config Wizard in the middle.
- c.) WARNING: When upgrading the SwyxWare Administration to version 12.0, the previously existing version of the MMC configuration file ("C:\Windows\System32\mmc.exe.config") will be overwritten during the upgrade to Release 12.0. If you had manually changed the old MMC configuration file, you may want to create a backup of the old MMC configuration file BEFORE the starting the upgrade to Release 12.0 to retain the changes to possibly insert the changes in the MMC configuration file for Release 12.0 after the upgrade to Release 12.

The table below shows the Operating System requirements for the corresponding SwyxWare components.

Component	os	Server requirements
SwyxWare Server	Windows Server 2012 R2 (last updates) Windows Server 2016 Windows Server 2019	Change for the hardware requirements.

We recommend customers use the "Preferred Version" for the given products. The preferred software versions offer tested and confirmed level of functionality. However, the devices might also operate with older or newer software version with the caveat that recently added interoperability or advanced features may not be possible when using these versions. In cases, if a defect is found when using other versions, it may be necessary to update to the supported version.

#### 11 Restrictions

Swyx-Flex (subscriptions license model) is only supported for the On-Premises installations

Swyx-Flex (Subscription license model) can only be used for the new SwyxWare installations. Update from lower versions to SwyxWare 11.50.0.0 and change of the Licensing model is currently not supported.

### 12 Support

The support for SwyxWare is handled through the regular Swyx Support process.
